THR — Total Herd Recording

Do you want us to help you save money on breed society registration fees?

- Do you currently register your calves with ACS?
- Do you inseminate most of your cows with Ayrshire or sexed semen?
- Do you want to pay your female registration fees each month to ACS based on the number of cows in your herd, rather than per calf registered.

If the answer to **any** of these questions is YES, then why not think about using THR?

Costing 25p per cow in the herd per month, (26p per month if registration certificate required), it's a simple way of managing cash flow and for many, can save money on registration fees.

For more details and a quote, please contact your local member of NMR field staff.

Or:

Telephone NMR customer services on 03330 043 043

Email : customerservices@nmr.co.uk.

**THR – demonstrating strong co-operation
between NMR and ACS, for YOUR benefit**

Profit from Milk Recording

Your milk sample – what else can you get out of it?...

Milk samples are taken from each cow and tested for Butterfat, Protein and Somatic Cell counts. Event information is recorded along with animal identities and ancestry data to provide a whole herd picture of Health, Fertility and feeding efficiency.

The Laboratories conform to the highest ICAR quality standards and regularly take part in European ring trial sampling. Johne's testing meets UKAS accreditation ISO 17025.

Farmers milk record for many different reasons:

- Improve bulk tank compositional payments
- Improve 100 day in-calf rate
- Monitor and manage feed efficiency
- Reduce Cell Count penalties
- Develop and implement a herd breeding plan
- Get expert third parties to analyse the records.

Call us now on

GeneTracker – the UK's 1st choice for Genomic Testing

Use GeneTracker to 'interview' and screen the heifers & cows in your herd to:

- Increase the profitability of your herd
- Identify those likely to be expensive passengers and avoid rearing costs
- Identify which heifers to breed/sell/implant
- Interactive reports to quickly evaluate genetic potential, design selection & make breeding decisions
- View youngstock, herd summary and individual animal reports
- Access results for production, health, fertility, conformation and associated GPLI, GTPI*, and GTM indexes
- Screen for known genetic recessives – many free of charge plus the option of testing for BVD*

* GTPI and BVD attract an additional fee

The Adams family welcomes you to the Bigginvale Herd.

The Adams family farm around 800 acres organically on two holdings, part tenanted and part owned. The 140 head Bigginvale herd of pure Ayrshires at Shirley Old Park Farm are housed in cubicles for the winter months and fed on silage mixed with crimped barley which is all grown on the farm. From April to October they graze on a strip grazing system with no buffer feeding. Organic concentrates bought from BOCM Pauls are fed in the parlour all year round. The breeding policy is pure Ayrshire, both natural service and A.I. bulls from Cattle Services Ayr using both young bulls and proven sires. A few beef straws are used, beef calves and batches of Ayrshire bull calves are reared to 30 months and sold organically to Dawn Carnaby at Bridlington ultimately ending up on the shelves of Marks and Spencers as do the lambs from the 100 Dorset sheep lambed in January.

At Town End Farm, Alstonefield (12 miles away) are the 32 head Bigginvale herd of pure Belted Galloway suckler cows, also housed in the winter months and fed on hay grown on the farm. A Belted Galloway bull is used and calving is usually in April/May to coincide with the lambing of the 360 sheep mainly Derbyshire Gritstone. All beef and lambs are kept to finishing and these also end up on Marks and Spencers shelves, but now a growing amount are sold to people locally, jointed and boxed ready for the freezer.

The whole family, Robert, Jennifer, Joanna, Richard, Nicola and Andrew make a good team with everyone taking active rolls covering all aspects of both farming enterprises. With the exception of the combining and crimping for which a contractor is used, everything else is done in house.

LET'S GET STRAIGHT TO THE POINT...

NORDIC STAR EAR TAGS ARE THE BEST IN THE INDUSTRY.

Nordic Star sell Gepe tags, which are made in Germany.

WE HAVE:

- One of the best retention rates of ear tags in Europe, based on independent research carried out in Holland last year.
- Glass fibre reinforced tips for smooth, quick and clean application.
- Patented cutting ring, speeds up healing and less distress to animals.
- Breaking point of shaft is 45kgs.

In house tag printing means fast turnaround of orders and flexibility.

Replacement tags ordered before 3pm will be on farm the following day.

Nordic Star operates from Harrogate, with experienced staff able to help with orders and answer queries.

Testing of BVD samples are carried out by NML, a sister business to Nordic star, reporting out via Herd Companion (web based).

Discounts for NMR customers and bulk orders.

Free Taggers with new orders over 100 tags if required.

what am I?

- I will infect your calves before they are 1 month old
- I will reduce your lifetime yields by 4000kgs
- I will make your cows 5 x more likely to go lame
- I will increase your SCC and clinical mastitis
- I will resist heat, cold and drying
- I will survive in your soil, slurry, and water for over a year

You will not know when I've arrived,
You will not know who I've infected,
But you will feel my presence on your profit margin.

Johne's disease

Stop second guessing your herd's status

One milk sample two results

NMR PREGNANCY TESTING

Save time and hassle in your milking parlour and boost herd fertility.

Using your existing NMR milk sample, you can now **detect pregnancy** at the same time – improving your herd's pregnancy rates and boosting productivity.

The tests are an impressive 96.7% specific (over 40 days from service) and 97.6% sensitive.

Our service includes an automatic, free, follow-up test for animals giving an inconclusive result, making it a convenient complement to your routine palpation and ultrasound examinations.

This service uses a test that is not looking for progesterone, but for Pregnancy Associated Glycoprotein, using ELISA technology. This eliminates having to sample at certain times of the month.
