Foreword

Mervyn, Malcolm & Mark are pleased to offer another selection of youngstock from the Hilltown Herd, for what is their ninth draft sale.

This sale offers purchasers another opportunity to obtain a wide selection of well-bred and trouble-free breeding from established cow families founded by the vendors in the 1950's.

The herd is run on a simple system of grazing and self-fed grass silage during the winter. Concentrates are fed in the parlour based on the previous seven days yield average.

Current Herd Average:

7085kgs	4.40% BF	3.55% P	scc120 (with no teat dipping practised)
---------	----------	---------	---

This sale includes a percentage of all groups of youngstock from freshly calved heifers down to January 2017 born yearlings which would be ideal for calf shows.

The herd is individually bred to a wide selection of old proven British bulls and young bulls that are available in AI. The best conformation and production cows are bred to proven bulls and a selection of sons are kept as herd sires and for semen collection. This has proved to be a very successful policy in not only helping us become one of the highest classified herds in the country but also allowing us to produce over 5000ltrs average from forage with our mature cows achieving up to 10,000ltrs per lactation.

Classifications

Our recent classifications show the success of our breeding policy with over 30 EX or EX upgrades at each visit with numerous VG heifers. Animals sold at previous sales also scored EX in their current owners' herds, and winning numerous shows and club awards.

Herd Health

The herd is vaccinated for BVD & Lepto and tests negative for IBR & Johnes. All youngstock receive Bravoxin 10 to guard against clostridial diseases and the weaned calves have had Bovilus Ringvac to prevent ringworm.

All animals in this sale are full pedigree and eligible for showing.

For more information or to view stock prior to the sale then please contact Mark on 07801 822797, Mervyn on 07713 758023 or Auctioneer Mark Davis 07773 371774.
