FOREWORD

The New Close herd of pedigree Ayrshires was first started in 1940, with many years of dedication and experience and successful breeding choices including use of sexed semen, the Watson family have produced an outstanding herd of cows that offer a rare opportunity to prospective buyers.

The decision to disperse the herd at New Close has not been an easy decision but it was made due to a change in farming practices.

The herd is on mainly grazed grass with grass silage supplemented and concentrate being fed through the parlour during milking. Cows are on an AYR calving system, with replacement heifers bred and kept on farm, meaning the farm is a closed herd, allowing for high health standards to be achieved. The health status of the herd is TB4 (last tested November 2024), Johnes and BVD free, all stock are vaccinated for IBR.

Cows are inseminated with sexed semen where appropriate and the rest are sired to beef. Youngstock are sired by Plaskett Bruno, Kamouraska Renoir, Brieryside Hail, Troutbeck Daring, Cuthill Towers Calcutta and Pam Ayr's Hawaiian.

Showing at many local shows has been a regular event calendar for the herd including Lowick, Westmorland and North Yorkshire Show.
